ZEOLITE PURIFYING SCRUB

Chirally Correct

DESCRIPTION:

Lavender Scrub

SKIN TYPES:

All skin types for environmental pollution-Anti Age/"SKINERCISE" R program

BENEFITS:

ZEOLITE SCRUB has two key components to it: Cage Zeolite and natural Jojoba beads. Cage Zeolite are compounds tailor-made into 3-D geometrical figures (e.g. tetrahedra) that serve as molecular cages. They cleave the bonds linking toxins to large cellular molecules, and then imprison the toxins in the Zeolite cage so they can be easily washed away. So you have one of the best possible toxin and debris removers in this scrub. Secondly- we've added natural, gentle Jojoba beads to help smooth and speed up the clarification process. Even those that are not fans of scrubs on the skin can be comfortable with the potent, yet non-intrusive nature of this special scrub. As our environment gets more and more polluted, you could think of this as a skin prophylactic to help protect it against the environment.

FOCUS INGREDIENTS:

- *Caprillic/Capric Triglycerides: emollient, moisturizing properties
- *Hamamelis Virginiana (Witch Hazel): astringent, cleansing, increases circulation, antiseptic
- *Glycerin: humectant, water-binding capabilities moisturizer
- *Zeolite: crystalline hydrated silicates traps heavy metal pollutants
- *Jojoba Beads: removes dead skins and polishes skin

SUGGESTED USE: It is recommended that the ZEOLITE SCRUB be applied gently to the face, neck and chest area in the AM. Use gentle circular movements.

INGREDIENTS: Aqua (Water), Caprylic / Capric Triglyceride, Diatomaceous Earth, Behenyl Alcohol, Glycerin, Jojoba Esters (Beads), Dicaprylyl Ether, Zeolite, Surose Stearate, Xanthan Gum, Sodium Stearoyl Glutamate, Lonicera Caprifolium (Honeysuckle) Flower Extract, Lonicera Japonica (Honeysuckle) Flower Extract, Gluconolactone, Sodium Benzoate, Hamamelis Virginiana (Witch Hazel) Water, Phytic Acid, Citric Acid, Potassium Sorbate.
